Sans Digital Introduces Infiniband / Multilane EliteRAID ER104TI

Santa Fe Springs, CA – November 2, 2007 – Sans Digital, a leading manufacturer of high performance storage subsystems, today introduced EliteSTOR ES104TI, 1U 4 bay JBOD Rackmount supporting both Serial Attached SCSI (SAS) and Serial-ATA (SATA). ES104TI is a revised version of the previous ES104T with additional of SAS support using Infiniband, also known as Multilane or SAS 4x or SFF-8470.

The EliteSTOR ES104TI series is a 1U 4 bay rack-mountable solution that supports both SAS (Serial Attached SCSI) 3.0-Gb/s or SATA 3.0-Gb/s interfaces. This system includes four hot-swappable 3.5" trays for hard drive installations, with up to 1TB per hard drive. Designed to provide optimal performance, each hard drive is connected to the computer via a dedicated eSATA channel for SATA devices, or via Infiniband / Multilane / SAS (4x SFF-8470) for SAS devices. With this dedicated quad channel design, the ES104TI could also be used with a RAID Host Bus Adapter (HBA) as an external RAID rackmount storage. ES104TI is the ideal storage solution for applications requiring high data throughput, availability, and flexibility in configuration.

"SAS replaces the legacy parallel SCSI with added performance, scalability and redundancy. The addition of ES104TI to the EliteSTOR series allows our users the access to this latest hard drive technology," stated Grandy Chen, Sans Digital's Executive Vice President. "At the same time, the addition of a RAID controller card is available for both SAS and SATA hard drives, instantly adding RAID capabilities to this JBOD unit." More product detail is available on the Sans Digital website: <http://www.sansdigital.com/elitestor/es104ti.html>.

Sans Digital, with headquarter located in Southern California, is a provider of high capacity, multi-functional advanced storage solutions. These storage solutions can be used for home offices, small and medium-sized businesses, video editing, data backup, surveillance systems, and other various industries. Sans Digital products provide suitable solutions for individuals and companies across the world that need effective and reliable data storage.
