Sans Digital Introduces AccuNAS 104LS

Santa Fe Springs, CA – September 21, 2007 – Sans Digital, a leading provider of high performance storage subsystems, today introduced AccuNAS AN104LS, a unified storage appliance that supports both NAS and iSCSI storage simultaneously in a 1U rack mount. While the original AN104L model is designed to utilize hardware based PCIe RAID engines, the new AN104LS is redesigned to support RAID 5 without additional hardware to provide businesses with an affordable IP storage solution.

The AN104LS series offers comprehensive IP storage in a feature-dense 1U server with Intel Celeron D Processor, with option to upgrade to Pentium Dual Core Processor. Utilizing the same concept in the AN104L model, the AN104LS is built with simple setup and maintenance features. Both the AN104LS and the AN104L include an installation wizard for easy implementation, convenience web-based management for local or remote configuration, dual 10/100/1000 network support for teaming or redundant networking, and RAID 5 support for data storage. In comparison to other NAS products in the market, both the AccuNAS AN104LS and AN104L are bundled with additional advanced and useful features at no additional cost. These features include iSCSI target support for server side iSCSI applications, iSCSI initiator support for easy future expansion, NAS to NAS folder replication, scheduled or on-demand volume snapshot, local tape backup support, and more.

“The trouble free AccuNAS series comes with enterprise-class features and stability,” stated Grandy Chen, Sans Digital’s Executive Vice President. “A performance tuned and security harden IP storage with unlimited clients, up to 4TB storage, PCI-X expansion for storage expansion with other AccuRAID storage subsystem, and dual Gigabit Ethernet are just some of the features that allow the AccuNAS series to satisfy any network storage need.” More product details can be found on the Sans Digital website: <http://www.sansdigital.com/accunas/an104ls.html>.

About Sans Digital

Sans Digital, located in Santa Fe Springs, CA is a provider of high capacity, multi-functional advanced storage solutions. These advanced storage solutions can be used for home offices, small and medium-sized businesses, video editing, data backup, surveillance systems, and other various industries. Our products provide suitable solutions for individuals and companies across the world that need effective and reliable data storage.
