**Dual Channel SAS or 8Gb/s Fibre Channel w/ Single Upgradeable or Redundant Controllers–
AccuRAID AR442X6 / AR442X6R / AR442F8 / AR442F8R**

City of Industry, CA – October 5, 2011 – Sans Digital, a leading provider of high performance storage subsystems, is proud to announce the new enterprise class top-loading 4U 42-bay AR442X6/AR442X6R(Single/Dual controllers) 6Gb SAS and the AR442F8/AR442F8R(Single/Dual Controllers) 6G/s SAS RAID rackmount storage solution with full-featured RAID management and data storage expansion capability.

The AR442X6 and AR442F8's innovative design allows customers to start with a single controller, offering dual channel SAS or quad channel 8Gbps Fibre Channel ports and upgradable to redundant controllers at a later time. The top-loading drives design allows up to 42 hard drives in a 4U form factor providing 75% more storage capacity than the traditional front loading 4U 24 bays configuration. The AR442X6(R) and AR442F8(R) support both 6G SAS and 6G SATA hard drives and are capable of expanding total storage capacity by adding up to 6 more JBOD expansion units supporting up to a total of 126 drives or 378TB raw capacity in one single setup. AccuRAID AR442X6(R) and AR442F8(R) provide hardware RAID, including RAID level 1, 5, 6, 10, 50 and 60 against potential hard disk failures. Each controller provides four channels of SAS or 8Gb/s Fibre Channel support, offering high bandwidth interfaces with ultra fast data transfer rate along with support for clustering application storage fail-over. Both the AR442X6(R) and AR442F8(R) offer a peace of mind due to the high quality constructions and redundancy features (dual controllers, power supplies, and cooling fans).

Designed to be used in a Fibre SAN (Storage Area Network), the Sans Digital AR442F8(R) is extremely suitable for high-definition video editing in a collaborative effort video editing environment. The Sans Digital AR442F8 provides quad 8Gbps Fibre Channel interface while the AR442F8R support 8 x 8Gbps Fibre channel interfaces with dual controllers. Fibre Channel topology allowing speedy data transfer with minimum EMI interference over long distance. The AR442F8(R) is suitable for use as a centralized storage for multiple servers in a Fibre SAN environment or in virtualization environments such as VMware, Microsoft Hyper-V and Citrix XGenServer for high-availability server computing and disaster recovery. The Sans Digital AR442X6(R) allows IT Administrator to provide super-fast data transfer rate between the host servers and its external RAID protected data storage system since the 6G SAS (Serial Attached SCSI) interface is designed to provide the fastest data transfer speed between its computer host and the directly attached storage.

"AccuRAID AR442X6 and AR442F8 are versatile RAID storage system that can be easily integrated into any enterprise Storage Area Networks for a large variety of data storage applications," said Stanley Chan, Director of Business Development of Sans Digital. "Customers can enjoy the industrial leading performance with the versatility of SAS or Fibre Channel connectivity along with RAID protection at an affordable price point." Both AR442X6(R) and AR442F8(R) are available for purchase immediately. For more information on the AccuRAID AR442X6(R) and AR442F8(R) series, please visit: <http://www.sansdigital.com/accuraid/index.php>.

* The use of SATA HDD drive with dual-controller storage model requires Qmux board for each HDD used.

About Sans Digital

Sans Digital, a leading provider of high performance storage subsystems is devoted to providing the highest quality storage devices with great flexibility, performance, aesthetics and value. Sans Digital offers hot-swappable JBOD and RAID storage products for direct attached storage, network attached storage, and storage area network to customers ranging from SOHO (Small Office, Home Office), SMB (Small, Medium Business) to enterprises worldwide.
