Sans Digital Announces High Performance 6Gbps AS212X6(HA) / AS316X6(HA) SAS Rackmounts

City of Industry, CA – July 13, 2011 – Sans Digital, a leading provider of high performance storage subsystems, is announcing an amazing performance-price breakthrough by adding a 6Gbps RAID controller to its latest AccuSTOR AS212X6(2U 12-bay) and AS316X6(3U 16-bay) 6Gbps SAS JBOD rackmounts. With a maximum data transfer throughput of up to 2400 MB/s utilizing the 6Gbps SAS interface along with the storage expansion capability of up to 4 more identical units utilizing the same 6Gbps Hardware RAID controller, the AS212XHA and AS316X6HA are hard to beat for its excellent performance and price ratio.

The AS212X6HA and AR316X6HA bundle are highly suitable for IO intensive computing applications such as high-definition video editing that requires high data transfer rates or database applications that perform concentrated IO calculation. For customers who already have a high-performance SAS RAID controller HBA, AS212X6 and the AS316X6 is ideal as 6Gbps RAID Controller card is not bundled as a package providing flexibility and cost saving when needed.

AS212X6(HA) and AS316X6(HA) provides features such as redundant power supply, hot-swappable trays and modularized components standard. Enterprise features such as auto rebuilding, multiple RAID volumes, online expansion, RAID roaming and RAID migration are also included in the (HA 6Gbps RAID HBA) bundle. By supporting SES, the AS212X6 and AS316X6 provides vital information to administrators, allowing detailed monitoring of power supply, cooling fan and drive status via the RAID controller to ensure a smooth 24x7 continuous operation.

The AS212X6 and AR316X6 utilize the latest 6Gbps SAS expander technology where the host server could access multiple SATA / SAS hard drives via one single SAS cable. As data storage demand increases, 6Gbps SAS has become the next generation technology for direct attached storage," said Stanley Chan, Director of Business Development, Sans Digital. "Adding the AS212X6 and AS316X6 to an existing IT infrastructure allows significant storage capacity increase along with excellent performance at an affordable price point." For more information on the AccuSTOR AS212X6 and AS316X6, please visit: <http://www.sansdigital.com/accustor/index.php>.

About Sans Digital

Sans Digital, a leading provider of high performance storage subsystems is devoted to providing the highest quality storage devices with great flexibility, performance, aesthetics and value. Sans Digital offers hot-swappable JBOD and RAID storage products for direct attached storage, network attached storage, and storage area network to customers ranging from SOHO (Small Office, Home Office), SMB (Small, Medium Business) to enterprises worldwide.
