**RAID in the Size of a Single 2.5" Hard Drive – Sans Digital Compact Flash Enclosures**

**City of Industry, CA** – May 23, 2008 – Sans Digital, a leading brand name of high performance storage subsystems, is expanding its Storage Gadget lines by introducing a new concept to the storage market: Compact Flash (CF) enclosures. The CompactSTOR CS1T and CompactRAID CR2T convert the widely popular Compact Flash card to a single 2.5" SATA hard drive storage device. The CS1T houses one Compact Flash card, while the CR2T supports spanning and RAID 1 (mirroring) by housing up to two Compact Flash cards.

Unlike existing RAID units that employs hard drives for storage space, the CS1T / CR2T utilizes pocket-sized lightweight Compact Flash cards as storage memory for data safekeeping. Designed with the same size and connectors as a 2.5" SATA hard drive, both units are compatible with the hard drive slot of laptops, industrial PCs (IPC), small form factor computers, and 2.5" hard drive enclosures. By utilizing Compact Flash cards as storage, both CS1T and CR2T embrace the same benefits as Solid State Disks (SSD), including less power consumption, minimized heat generation, shock prevention, and noiseless operation. The user is able to benefit from the features of a Solid State Disk at a fraction of the cost while using the CS1T or CR2T.

The installed Compact Flash cards and hardware components within the units are concealed by dust-free covers to prevent dirt and static buildup. The CS1T supports the latest Compact Flash capacity, while the CR2T doubles that capacity by operating two cards in spanning mode. "The CS1T and CR2T makes data backup and protection possible in a restricted environment," states Grandy Chen, President of Sans Digital. "The units are designed using standard 2.5" hard drive connectors, making instant upgrades possible by providing mirroring in laptops and IPC computers, where only a single 2.5" hard drive could be installed." For more details on CS1T and CR2T, please visit: <http://www.sansdigital.com/compact-flash-storage/cs1t.html> and <http://www.sansdigital.com/compact-flash-storage/cr2t.html>.

**About Sans Digital**

Sans Digital is a brand of high capacity, multi-functional advanced storage products. Sans Digital offers hot-swappable JBOD and RAID products for direct attached storage, network attached storage, and storage area network. Sans Digital's single unit towers are designed with mobility in mind to be used in a personal and home environment, while its rackmounts are widely popular in enterprise settings. Sans Digital is a storage solutions provider to consumers, businesses and institutions across the world.
