Sans Digital to Bundle NTI Instant Backup Software! NTI Shadow V3 Now Included with Sans Digital MobileSilver Series!

Santa Fe Springs, CA – June 21, 2006 – Sans Digital, a leading provider of high performance storage subsystems, announced that their MobileSilver Series now comes bundled with NTI's award winning Shadow V3 software. Starting immediately, NTI's Shadow V3 software for Windows XP®, Windows 2000®, and Macintosh® OS X v10.3+ is included with Sans Digital's MobileSilver Series product line. NTI Shadow's unique, convenient, continuous, native format backup solution with built-in support for USB, Firewire (IEEE1394), SCSI devices were key factors in Sans Digital's decision to bundle the software with their MobileSilver Series.

"Not only does Sans Digital's MobileSilver Series provide high capacity storage via common computer interfaces, this series also provides personal backup," stated Grandy Chen, Sans Digital's vice president of sales and marketing, "and now by combining both NTI Shadow V3 software and RAID level protection this series offers double protection from losing data due to software and hardware failure."

Features

In high demand since it was first launched in August 2005, NTI Shadow puts an end to losing valuable video, photo, music, and data files that have been modified. NTI Shadow v3 maintains real-time, continuous backup of all changed files as you work and also includes an advanced scheduler that enables users to set backup start times by minute, hour, day, week, or month. NTI Shadow supports Windows XP®, Windows 2000®, and Macintosh® OS X v10.3+ environments. In addition to conveniently executing backup jobs transparently in the background without disturbing the user, NTI Shadow does not take up valuable resources that could slow system performance.

Sans Digital's MobileSilver Series provides a comprehensive selection of storage solutions for consumers. The following Sans Digital products come pre-bundled with NTI Shadow V3 software:

MS1UT - The world's first single bay USB and eSATA external enclosure designed with a removable tray.

MS2C1- Features 3 interfaces, 2 removable trays all in 1 enclosure. It supports Firewire 800, Firewire 400 and USB 2.0. Also features built-in hardware RAID 0 and JBOD engines which makes it a perfect choice for a mixed PC and MAC environment.

MS2UT - Utilizes cutting edge eSATA connections to provide ultimate performance. With an LCD display and Hardware based RAID 0 and RAID 1 engines, the MS2UT can provide flexibility between high performance and ultimate protection of data.

- more -

MR5CT1 and MR5S1- These units are multi-functional RAID subsystems that support RAID 0, 1, 0+1, 3, 5, 6 and JBOD. The MR5CT1 features widely available USB, Firewire 800 and eSATA Interfaces. The MR5S1 features a high-performance Ultra 320 SCSI interface.

Pricing and Availability

The MobileSilver Series excluding MS1U will now come pre-bundled with NTI Shadow V3 software at no extra cost. Visit Sans Digital at www.sansdigital.com to purchase a unit or to find a reseller near you.
