New Sans Digital Video Surveillance Appliance Provides Robust Management with Fast Video Search and Playback, Long Term Retention through Multi-Tiered Storage, and Compatible with Over a Thousand High Definition IP-Cameras

[Visit us at ASIS Booth# 3084 for Affordable Professional-Grade Video Surveillance Appliance for Live Demo](#)

City of Industry, CA – September 1st, 2011 – Sans Digital, a leading provider of high performance storage subsystems, is proud to announce the release and immediate shipment of a full-line of video surveillance appliances, the Sans Digital VSA. These solutions support the latest high-definition IP-cameras for live view and recording operations. Sans Digital's expertise in storage infrastructure solutions provide video surveillance customers with long term retention with the most relevant search capabilities on the market. The Sans Digital Video Surveillance Appliance can deliver the longest retention period in the industry when teamed with offline storage devices such as Spectra Logic's T-Series family of LTO-5-based data tape libraries.

The Sans Digital Video Surveillance Appliance (SD VSA) provides advanced video surveillance data storage and management, including live video capture and complete video lifecycle management. Focusing on the record, store, and manage aspects of a forensics-based video surveillance system, Sans Digital VSA solutions deliver professional-grade video management system (VMS) capabilities including ultra fast search and playback capability. The Sans Digital VSA product family offers a unique combination of disk-based and data tape (LTO5) storage in a video storage environment with virtually no limitation on video retention.

The Sans Digital VSA family of video surveillance appliances allow for greater usage of HD IP cameras such as the COHU Helios line of High Definition – High Performance Series H.264 cameras. "The Sans Digital VSA product family allows customers the ability to take full advantage of the features and power of the Cohu brand of Helios HD IP cameras. Customers are no longer limited to doing less with their camera investment because of their storage and management solutions," stated Brian Leedy, President of COHU Electronics.

Supporting full 30 frames-per-second and megapixel RTSP-enabled IP cameras, the Sans Digital VSA product line is addresses the shortcomings of the traditional analog video surveillance system by reducing storage costs for long retention while maintaining the best possible video quality. Compared to the traditional close-circuit camera analog recording system, the Sans Digital VSA allows seamless IP camera integration (currently compatible with over 1,150 RTSP-enabled IP-camera models) with advance video search capability all in a RAID protected data storage tower and rackmount system.

"The Sans Digital VSA solution allows for the longest term retention periods by taking advantage of the offline retention capabilities of the Spectra Logic's T-Series data tape libraries with LTO-5 drives and media. This in turn allows for the ongoing migration of video feeds from the Sans Digital VSA device to the LTO tape library, all under constant management and ready for fast access and playback of any needed video asset," stated Patrick Claffey, VP of Video Surveillance Solutions at Spectra Logic.

"Sans Digital VSA's 'pay as you grow' model allow customers the ability to purchase additional VSA units when more IP-cameras or retention capacity is needed. And by working closely with our technology partners, Sans Digital is able to offer the best-of-breed surveillance solution supporting the newest state-of-the art technologies and peripherals while offering the lowest total cost of ownership," stated Grandy Chen, President of Sans Digital.

About Sans Digital

Sans Digital, a leading provider of high performance storage subsystems is devoted to providing the highest quality storage devices with great flexibility, performance, aesthetics and value. Sans Digital offers hot-swappable JBOD and

RAID storage products for direct attached storage, network attached storage, and storage area network to customers ranging from SOHO (Small Office, Home Office), SMB (Small, Medium Business) to enterprises worldwide.

About Spectra Logic Corporation

At Spectra Logic we define, design and deliver innovative data protection through tape and disk-based backup, recovery and archive storage solutions. By igniting innovation we challenge expectations of the data protection market with intelligent, integrated, and simple to use backup and archive technologies. Spectra's tape library product line swept Storage magazine/SearchStorage.com's 2010 Quality Awards for enterprise and midrange tape libraries, winning first place in all 14 categories. Throughout our 30-plus year history we have delivered high-density, feature rich storage with unmatched service and support to customers worldwide.

About Cohu

Cohu Electronics manufactures High Performance surveillance cameras and integrated video systems and is proud to protect some of the world's most extreme environments. Cohu offers High – Definition IP based camera systems that are available as Thermal / Long Range / Explosion Proof / Fixed Barrel/ Dome and Pan – Tilt – Zoom options. Rugged cameras designed for critical security applications, offering brilliant video image quality and built for high- perform in -40C to 74C conditions. For more information visit cohu-cameras.com.
