### Sans Digital Introduces TowerRAID Series

**Santa Fe Springs, CA** – September 7, 2007 – Sans Digital, a leading provider of high performance storage subsystems, today introduced its new TowerRAID series that includes the TR4M SATA to JBOD enclosure and the TR4U SATA to USB 2.0 JBOD / Spanning enclosure.

#### TowerRAID TR4M

The TowerRAID TR4M is a compact 4-bay tower utilizing the latest SATA II port multiplier feature, where one single eSATA cable connects to four 3Gbps SATA II hard drives. This unit comes with a 2-ports eSATA PCIe card (HA-SAN-2ESPCIE) at no additional cost, which allows the connection between two TR4M units (up to 8 hard drives) using only two cables. Supporting RAID 0, 1, 0+1, 5, 5+spare, spanning and JBOD using latest Silicon Image SATARAID utility, this compact tower can virtually solve all the storage need.

#### TowerRAID TR4U

The TowerRAID TR4U is a selectable hardware JBOD or spanning enclosure that utilizes widely available USB 2.0 interface for storage expansion. The JBOD mode allows the computer to see each individual hard drive, while the spanning mode presents multiple hard drives as one combined drive. Various combinations of JBOD and spanning mode can be used, making it an effective way to expand storage using USB 2.0.

Both units feature hard drive bay cover, cable-less backplane, and tray-free swappable design. Both models incorporated operating system independent design with support for Linux, Windows 2000/2003, Windows XP and Windows Vista, and Mac OS X. "In addition to their market-leading technology, the appearance of the TowerRAID series stays true to Sans Digital's contemporary and user friendly hardware design," stated Grandy Chen, Sans Digital's Executive Vice President. "The TowerRAID series introduces configuration flexibility to meet specific storage requirements."

#### About Sans Digital

Sans Digital, located in Santa Fe Springs, CA is a provider of high capacity, multi-functional advanced storage solutions. These advanced storage solutions can be used for home offices, small and medium-sized businesses, video editing, data backup, surveillance systems, and other various industries. Our products provide great solutions for companies and individuals across the world that need effective and reliable data storage.
